

FloorLabs

One Step Ahead

The main functions of the parquet underlay, which provides the connection between the parquet and the floor, are as follows.

* Improving the Properties of the Parquet,

* Increasing the Efficiency of Heat Insulation,

* Protecting the Parquet Against Temporary Pressure,

* Doing Sound Insulation

- LAY OUT UNDER ANY FLOORING OR CEMENT FINISH AS FREE.
- AFTER PUT 5CM CEMENT FINISH , THE SOUND INSULATION CAPACITY WILL BE MORE GOOD.
